

Cliplets Editor

Tapping or clicking on an individual cliplet in "Projects", "On cliplets.com", and "Gallery" will play the cliplet in place and open the app bar. Other options for an individual cliplet (edit, view in full screen, etc.) will be available from the app bar.

Zooming in on the "Projects" screen brings you to a larger view (what we call "train view") and a full screen view. Zooming out takes you back to the smaller views.

MS account required to share. Facebook and Twitter accounts required to share to those targets. First use of Cliplets share target optionally walks user through account setup. Otherwise, MS account login prompted only when user is not signed in to MS (no prompt when not logged in to Facebook or Twitter).
